PLASMA AIR FILTER
AT1000

Using clean dry air with a Plasma Cutter is crucial as moisture can condense inside the torch lead & head and cause a short-circuit within your torch. The AT1000 filter elminates the sputter caused by moisture and oil from compressed air lines. Other advantages include longer lifespan of consumables and improved cut quality from your machine. With new and improved technology, the plasma air filter is able to entrap particles as small as .01 microns.

- Includes filter element
- Filters up to 1,250 L/min
- Removes contaminates
- Entraps moisture
- Extends consumables life
- Prevents torch short-circuit
